Preface x

## CHAPTER 1

### Contemporary issues in accounting 1

- 1.1 The nature of accounting and the role of accountants 3
  - Evaluating contemporary accounting issues: the approach in this text 9
- 1.2 What is theory? 10
- 1.3 Why we need theories 10
- 1.4 Understanding the role of research 12
  - Relationship between theory and research 12
- 1.5 Research areas in accounting 13
  - Capital market research 13
  - Accounting policy choice research 13
  - Accounting information processing research 13
  - Critical accounting research 13
  - International accounting research 13
- 1.6 The case study approach 15
  - What is a case study and why are they used? 15
  - How to approach a case study question 16
  - Overview of chapters in this text 19
  - Summary 20
  - Key terms 21
  - Review questions 22
  - Application question 22
  - Case study 1.1 22
  - Case study 1.2 24
  - Additional readings 25
  - Endnotes 25
  - Acknowledgements 26

## CHAPTER 2

### Standard setting 27

- 2.1 What is an accounting standard? 29
- 2.2 Institutional framework 29
  - The International Accounting Standards Board 29
  - The Financial Accounting Standards Board 30
  - Accounting standard setting in Australia 30
  - The Financial Reporting Council 31
  - The Australian Accounting Standards Board 31
  - Project Advisory Panels 31

- The User Advisory Committee 31
- The standard-setting process 31
- 2.3 Rules-based versus principles-based standards 33
  - Advantages of rules-based standards 34
  - Disadvantages of rules-based standards 34
  - Advantages of principles-based standards 35
  - Disadvantages of principles-based standards 35
- 2.4 Theories of regulation 35
  - Defining regulation 36
  - Advantages and disadvantages of regulation 37
  - Theory and accounting regulation research 39
- 2.5 The political nature of setting accounting standards 39
  - Lobbying 40
  - Lobby groups 41
- 2.6 Harmonisation 42
  - Summary 44
  - Key terms 44
  - Review questions 45
  - Application questions 46
  - Case study 2.1 47
  - Case study 2.2 48
  - Additional readings 49
  - Endnotes 49
  - Acknowledgements 51

## CHAPTER 3

### Measurement 52

- 3.1 Measurement in accounting 54
  - Benefits of measurement 55
  - Limitations of measurement 55
- 3.2 Measurement approaches and the accounting standards 56
  - Measurement approaches 56
  - Measurement and international accounting standards 57
  - Decision criteria and influences on choice of measurement approach 63
- 3.3 Measurement and the quality of accounting information 63
  - Historical cost 63
  - Fair value 64
  - Current value/cost 64
  - Present value 65
- 3.4 Fair value 67
  - Valuation methods 67
  - Arguments for fair value 68
  - Arguments against fair value 68

3.5	Stakeholders and the political nature of accounting measurement	69
	Existing and potential investors	70
	Lenders and other creditors	70
3.6	Why measurement is a controversial accounting issue	72
3.7	Current measurement challenges	73
	Green assets and other sustainability issues	73
	Intangible assets	75
	Heritage assets	76
	Water assets	77
	Summary	79
	Key terms	80
	Review questions	80
	Application questions	81
	Case study 3.1	82
	Additional readings	84
	Endnotes	84
	Acknowledgements	84

## CHAPTER 4

### Theories in accounting 85

4.1	What value does theory offer?	87
	Types of theories	87
4.2	Positive accounting theory	88
	Contracting theory	88
	Agency theory	89
	Owner–manager agency relationships	90
	Manager–lender agency relationships	93
	Role of accounting information in reducing agency problems	94
	Information asymmetry	95
4.3	Institutional theory	95
4.4	Legitimacy theory	96
	Social contract	97
	Organisational legitimacy	97
	Accounting disclosures and legitimation	99
4.5	Stakeholder theory	100
	Role of accounting information in stakeholder theory	102
4.6	Contingency theory	103
	Comparison of theories	103
4.7	Using theories to understand accounting decisions	104
	Expensing and capitalising costs	104
	Accounting estimates	105
	Disclosure policy	105
4.8	Evaluating theories	105
	Summary	107
	Key terms	108
	Review questions	109
	Application questions	110
	Case study 4.1	112

Case study 4.2	112
Case study 4.3	113
Additional readings	114
Endnotes	115
Acknowledgements	118

## CHAPTER 5

### The Conceptual Framework for Financial Reporting 119

5.1	The role of a conceptual framework	121
	Conceptual framework theory	122
	How a conceptual framework differs from an accounting standard	122
5.2	The history of the <i>Conceptual Framework</i> and current developments	122
	Current developments	124
5.3	The structure and components of the <i>Conceptual Framework</i>	124
5.4	Prudence in the <i>Conceptual Framework</i>	128
	Recognition in the 2018 <i>Conceptual Framework</i>	130
5.5	The benefits of a conceptual framework	132
	Technical benefits	132
	Political benefits	133
	Professional benefits	134
5.6	Problems with and criticisms of the <i>Conceptual Framework</i>	135
	The <i>Conceptual Framework</i> can be ambiguous	135
	The <i>Conceptual Framework</i> is descriptive, not prescriptive	136
	The concept of faithful representation is inappropriate	136
	Inconsistencies between requirements in accounting standards, the <i>Conceptual Framework</i> and the 'real' world	138
	Accounting for intangibles	138
5.7	Applying the <i>Conceptual Framework</i>	140
5.8	Conceptual frameworks for other sectors	142
	Summary	144
	Key terms	145
	Review questions	145
	Application questions	146
	Application of definitions and recognition criteria in the <i>Conceptual Framework</i>	147
	Case study 5.1	149
	Case study 5.2	150
	Additional readings	152
	Endnotes	153
	Acknowledgements	154

**CHAPTER 6****Corporate governance 156**

- 6.1 The interest in corporate governance 158
  - Problems with the management of corporations 158
  - Advantages of good corporate governance 159
- 6.2 What is corporate governance? 159
  - Corporate governance stakeholders 159
- 6.3 The need for corporate governance systems 160
  - Positive accounting theory and its relationship with corporate governance 160
- 6.4 Corporate governance guidelines and practices 161
  - Elements of corporate governance 162
- 6.5 Approaches to corporate governance 165
  - The rules-based approach to corporate governance 165
  - The principles-based approach to corporate governance 166
- 6.6 Developments and issues in corporate governance 167
  - Risk management 167
  - Executive remuneration 171
- 6.7 The role of accounting and financial reporting in corporate governance 173
  - Deterring, preventing and encouraging certain actions and decisions 173
  - Informing shareholders and stakeholders 174
  - Financial reporting 'problems' 174
- 6.8 Corporate failure 176
- 6.9 The role of ethics 178
  - Codes of ethics for professional accountants 180
  - Ethical decision-making model 181
- 6.10 International perspectives and developments 181
  - Summary 183
  - Key terms 184
  - Review questions 184
  - Application questions 185
  - Case study 6.1 186
  - Case study 6.2 188
  - Additional readings 189
  - Endnotes 189
  - Acknowledgements 191

**CHAPTER 7****Technology in accounting 193**

- 7.1 Introduction to digital technology and digital disruption 195
  - Digital transformation 195
  - Information systems 196

Analytics 197

Digital disruption 198

Accountants responding to digital disruption 198

- 7.2 Digital technology trends 199
  - Increased computing power 199
  - Big data 199
  - Artificial intelligence (AI) 200
  - Automation 200
  - Visualisation 200
  - Blockchain technology 201
  - Cloud and edge computing 201
  - Quantum computing 202
  - Extensible business reporting language (XBRL) 202
  - Spreadsheets 202
- 7.3 Digital transformation in accounting 202
  - Who* accounting is done by 203
  - What* accounting can achieve 203
  - Where* accounting is done 204
  - When* accounting is done 204
- 7.4 The role of AI and big data on audit 205
  - An auditor's role 205
  - More insightful risk assessment with data analytics 206
  - Using big data to calculate expected values 208
  - 100% population testing 210
  - Some other ways technology is influencing auditing 211
  - Re-imagining the audit process 211
- 7.5 Cybersecurity, information privacy and ethics 212
  - Ethical AI frameworks 213
  - Data risk management 214
  - Privacy-enhancing technology 215
  - Avoiding over-reliance on technology 215
  - Digital technologies supporting ethical behaviour 215
  - Summary 217
  - Key terms 218
  - Review questions 219
  - Application questions 219
  - Case study 7.1 219
  - Case study 7.2 221
  - Additional readings 222
  - Endnotes 223
  - Acknowledgements 224

**CHAPTER 8****Capital market research and accounting 225**

- 8.1 Capital market research and accounting 227
- 8.2 Relationship between accounting performance and share price 227

8.3	Research methods: event studies and value relevance	230
8.4	Research examining the information content of accounting information	230
	Prices lead earnings	231
	Post-earnings announcement drift	231
	Cosmetic accounting choices	232
	Capital markets and their participants' reactions to accounting disclosures	232
8.5	Do auditors or intermediaries add value to accounting information?	233
	Voluntary disclosure theory	233
8.6	Value relevance of accounting information	234
	What value relevance studies tell us	235
	Relevance and faithful representation	235
	Measurement perspective research	236
8.7	The efficiency of capital markets	236
	Testing whether capital markets are efficient	237
8.8	Behavioural finance	238
	Cornerstones of behavioural finance	240
	Summary	242
	Key terms	242
	Review questions	243
	Application questions	244
	Case study 8.1	244
	Additional readings	246
	Endnotes	246
	Acknowledgements	248

## CHAPTER 9

### Earnings management 249

9.1	The importance of earnings	251
9.2	What is earnings management?	251
9.3	Methods of earnings management	252
	Accounting policy choice	252
	Accrual accounting	253
	Income smoothing	253
	Real activities management	253
	Big bath write-offs	254
9.4	Why do entities manage earnings?	254
	Entity valuation	255
	Earnings quality	256
	Managerial compensation and earnings management	257
	Change in CEO and earnings management	258
	Corporate distress and failure	258
9.5	Consequences of earnings management	259
9.6	Corporate governance and earnings management	259
	Summary	261
	Key terms	262
	Review questions	262
	Application questions	263
	Case study 9.1	264

Case study 9.2	265
Additional readings	266
Endnotes	266
Acknowledgements	268

## CHAPTER 10

### Sustainability and corporate social responsibility 269

10.1	What is sustainability?	271
10.2	Sustainability reporting	272
	Integrated reporting	273
	Environmental reporting	275
10.3	Guidelines for sustainability reporting	275
	The Global Reporting Initiative	276
	Mandatory sustainability reporting requirements	277
10.4	Stakeholder influences	280
	Ethical investment	283
10.5	Environmental and social management systems	284
10.6	Climate change and accounting	284
	Emissions reduction schemes	285
	Accounting for carbon emissions	287
	Summary	288
	Key terms	289
	Review questions	289
	Application questions	290
	Case study 10.1	290
	Case study 10.2	292
	Additional readings	293
	Endnotes	293
	Acknowledgements	296

### International accounting 298

11.1	Definition of international accounting	300
11.2	Diversity of international accounting practice	300
11.3	Environmental influences on accounting	301
	Cultural impact on accounting practice	302
	Religion and how it affects accounting practice	304
11.4	International adoption of IFRSs	304
	Harmonisation, convergence and adoption — what's the difference?	305
	Benefits of IFRS adoption	305
	Limitations of IFRS adoption	305
	Adoption of IFRSs around the world	306
11.5	FASB and IASB convergence	309
11.6	Multinational organisations	309
	Summary	311
	Key terms	312
	Review questions	312
	Application questions	312

Case study 11.1	313
Additional readings	314
Endnotes	314
Acknowledgements	315

## CHAPTER 12

### Fair value accounting 317

12.1	The role of fair value in accounting	319
	The usefulness of fair value as an economic measure and its relationship with the fundamental assumptions	319
12.2	The traditional definition	320
	Shortcomings of the traditional definition	320
12.3	AASB 13/IFRS 13 fair value measurement	320
	Fair value defined	321
	The focus on an exit price — why?	321
	The importance of the concept of a market	322
	What are the characteristics of the market	322
12.4	Fair values are specific, what factors should be considered?	324
	Discussion of the highest and best use for non-financial assets	325
	Applications for liabilities and equity: general principles	326
12.5	Fair value techniques	328
	Acceptable valuation techniques	328
	Inputs into valuation	329
	The fair value hierarchy	329
12.6	Disclosures	332
12.7	Specific issues when applying the standard	334
	How to deal with transaction costs	334
	How blocks of assets are dealt with	334
	Fair value at initial recognition different to cost	334
	The role for third-party valuations	335
12.8	Application to financial instruments and biological assets	335
	Financial instruments	335
	Biological assets	335

Summary	337
Key terms	338
Review questions	338
Application questions	339
Case study 12.1	340
Case study 12.2	342
Additional readings	343
Endnotes	344
Acknowledgements	344

## CHAPTER 13

### Products of the accounting system 345

13.1	Identification of the reporting entity	347
13.2	When information is reported	347
	Arguments for the standardisation of reporting periods	348
	Arguments for a more flexible approach to reporting periods	348
	Interim reporting	348
13.3	Manipulation of reported earnings	349
	Earnings management	349
	Income smoothing	350
	Pro forma reports: massaging earnings	350
13.4	Exclusion of activities from the financial reporting process	351
	Intangibles	351
	Intellectual capital	353
13.5	Voluntary disclosures	353
	Electronic reporting	354
13.6	Why entities voluntarily disclose	356
	Management motivation to disclose	356
	Research into annual reports	357
	Summary	359
	Key terms	360
	Review questions	360
	Application questions	360
	Case study 13.1	361
	Additional readings	363
	Endnotes	363
	Acknowledgements	365

Index	366
